EnergyNotes
FOR YOUR BUSINESS

Affordable clean energy leads to even lower bills

Every dollar counts when it comes to your business expenses. We know that. That's why, starting in May, your FPL electric rates are expected to go down again – the second decrease in six months.

A typical business will see a 3 to 6 percent decrease, depending on rate class and usage, thanks to projected lower fuel costs.* These savings will help keep electric bills for our business customers among the lowest in Florida and lower than the national average.

We're able to pass savings on to you primarily because of our ongoing commitment to affordable clean energy, which includes replacing older oil-fueled power plants with ones that run on clean, affordable American natural gas.

3–6% savings monthly*

** The Florida Public Service Commission is expected to review FPL's request to lower its fuel rate on April 16. Visit FPL.com/rates for the latest information.*

Partnership advances solar energy in Florida

It's full speed ahead for affordable clean energy at Daytona International Speedway. FPL is installing more than 5,000 solar panels that will help power the iconic Florida venue and FPL customers via our grid. The installation will cut an estimated 2,200 metric tons of carbon dioxide each year – equivalent to the emissions from a car driving 2 million laps around the Speedway. See how we're helping communities across the state make the most of Florida's sunshine: » **FPL.com/solar**

Changing Florida's energy future, today

FPL is committed to advancing the use of solar energy. And, with the new FPL voluntary solar partnership program, you and your business can help support the building of solar energy systems that will bring more clean energy to local communities. Learn how you can help to make the air we all breathe cleaner and keep Florida beautiful:
